Program Information

1. Program Name Doctor of Optometry (International Program)

2. Degree Awarded Doctor of Optometry (O.D.)

3. Philosophy

The Doctor of Optometry (International Programme) aims to produce graduates who possess knowledge and academic competence in line with international standards, along with appropriate attitudes. Graduates will have a humanistic spirit, embody moral virtues, and communicate effectively. They will be able to work well with multidisciplinary health care workers and take responsibility for basic eye health care tasks, promoting eye health within the national public health system. Additionally, they will have research skills and the ability to continuously develop themselves to meet the needs of the country and the global society.

4. Program Educational Objectives (PEOs)

To ensure that graduates of the programme possess the following characteristics

1) Possesses knowledge and skills in optometry; capable of inspecting, evaluating, diagnosing, managing, preventing, and rehabilitating eye and visual problems, as well as providing advice and consultation on eye, vision, and sight issues in a holistic manner, at individual, family, and community levels.

2) Possesses a positive relationship, demonstrates leadership skills necessary for collaborative work, and has effective communication skills. Additionally, holds proficiency in both Thai and English languages to serve Thai and international clients. Moreover, is capable of functioning as part of a multidisciplinary team and possesses knowledge in hospital management.

3) Demonstrates proficiency and expertise in the integration and application of knowledge within optometry and visual sciences for research purposes and the planning of public health service systems aimed at addressing issues related to eyesight and vision at individual, familial, and community levels. Possesses the ability to assess situations, identify characteristics, determine severity levels of problems, and manage issues appropriately.

4) Demonstrates awareness of one's roles, responsibilities, and duties, adhering to professional ethics with honesty and integrity. Maintains morality, discipline, and respect for social rules and regulations. Exhibits cultural consciousness in daily life and is capable of behaving as a role model within society.

5. Career Opportunities

- Independent practitioner
- Optometrist in private optical retail
- Optometrist in hospital and medical center
- Specialist in optical and contact lenses companies
- Researcher or scientist
